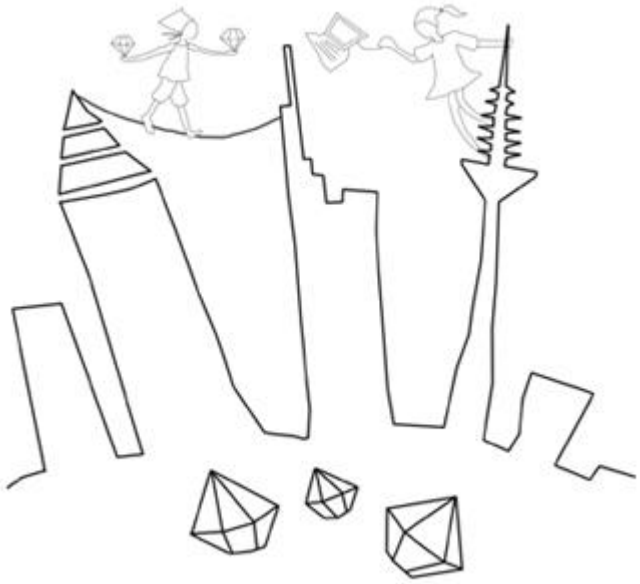
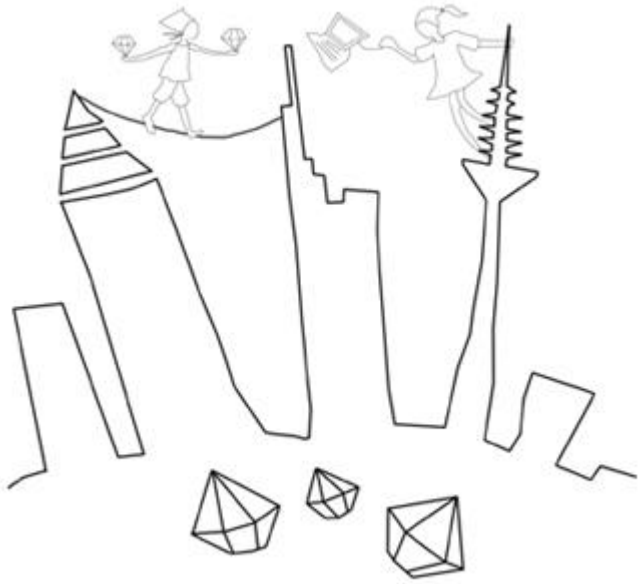
The most essential feature of the internet



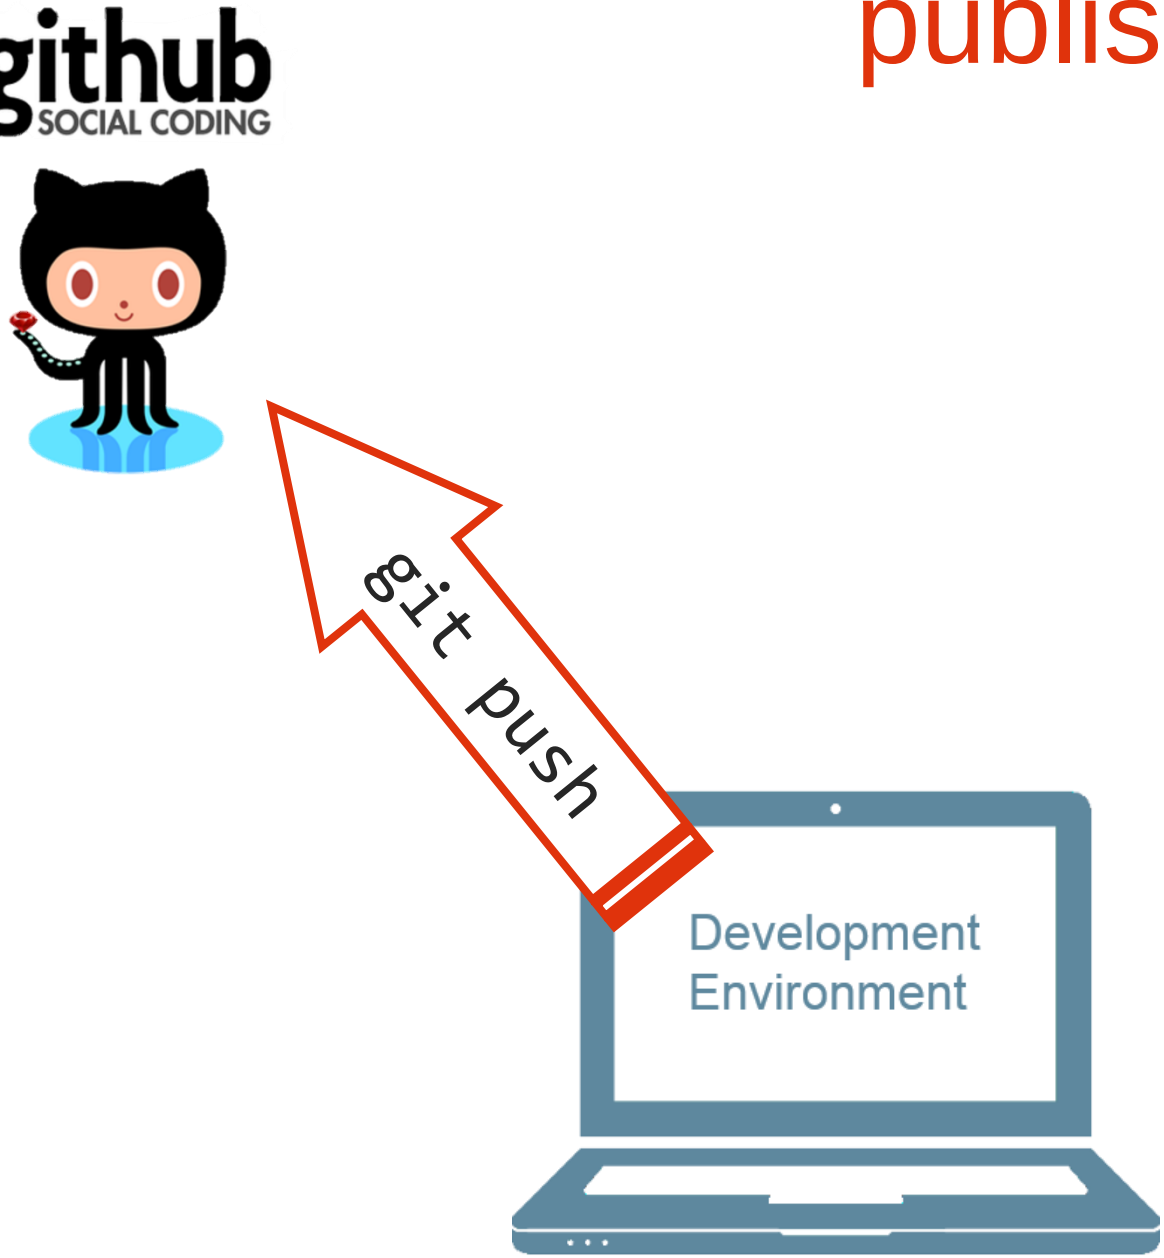
The most essential feature of the internet is

to publish to the world

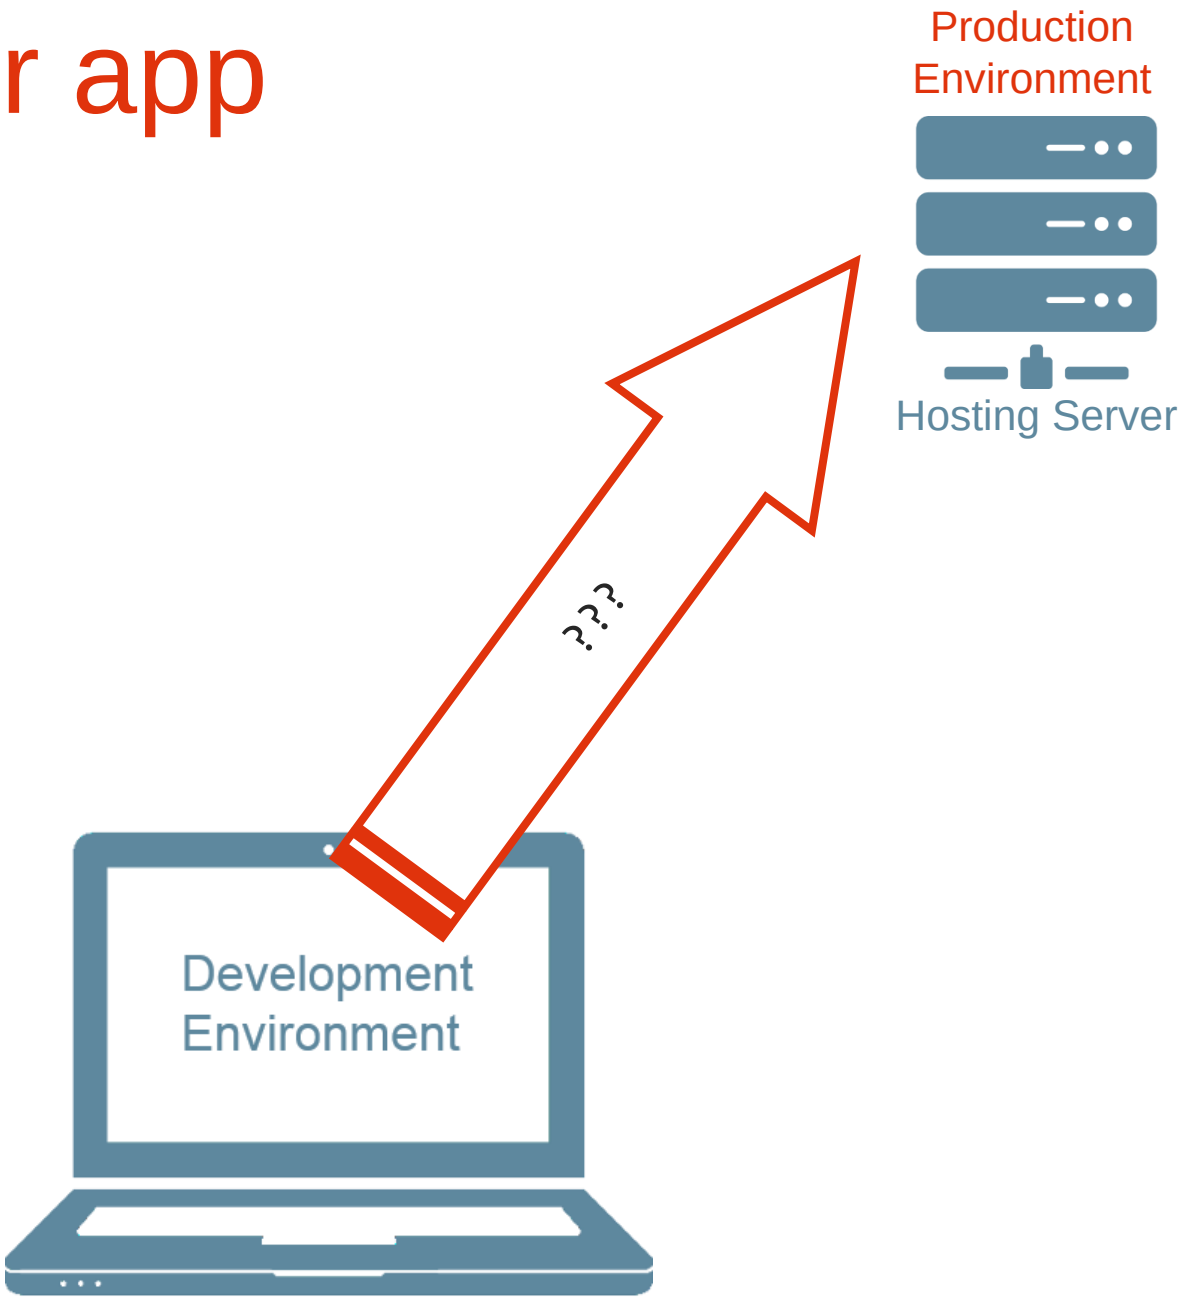


Development
Environment

publish your code



publish your app



publish your app

get started

Prepare Gemfile

```
# Gemfile

group :development do
  gem 'sqlite3'
end

group :production do
  gem 'pg'
end
```

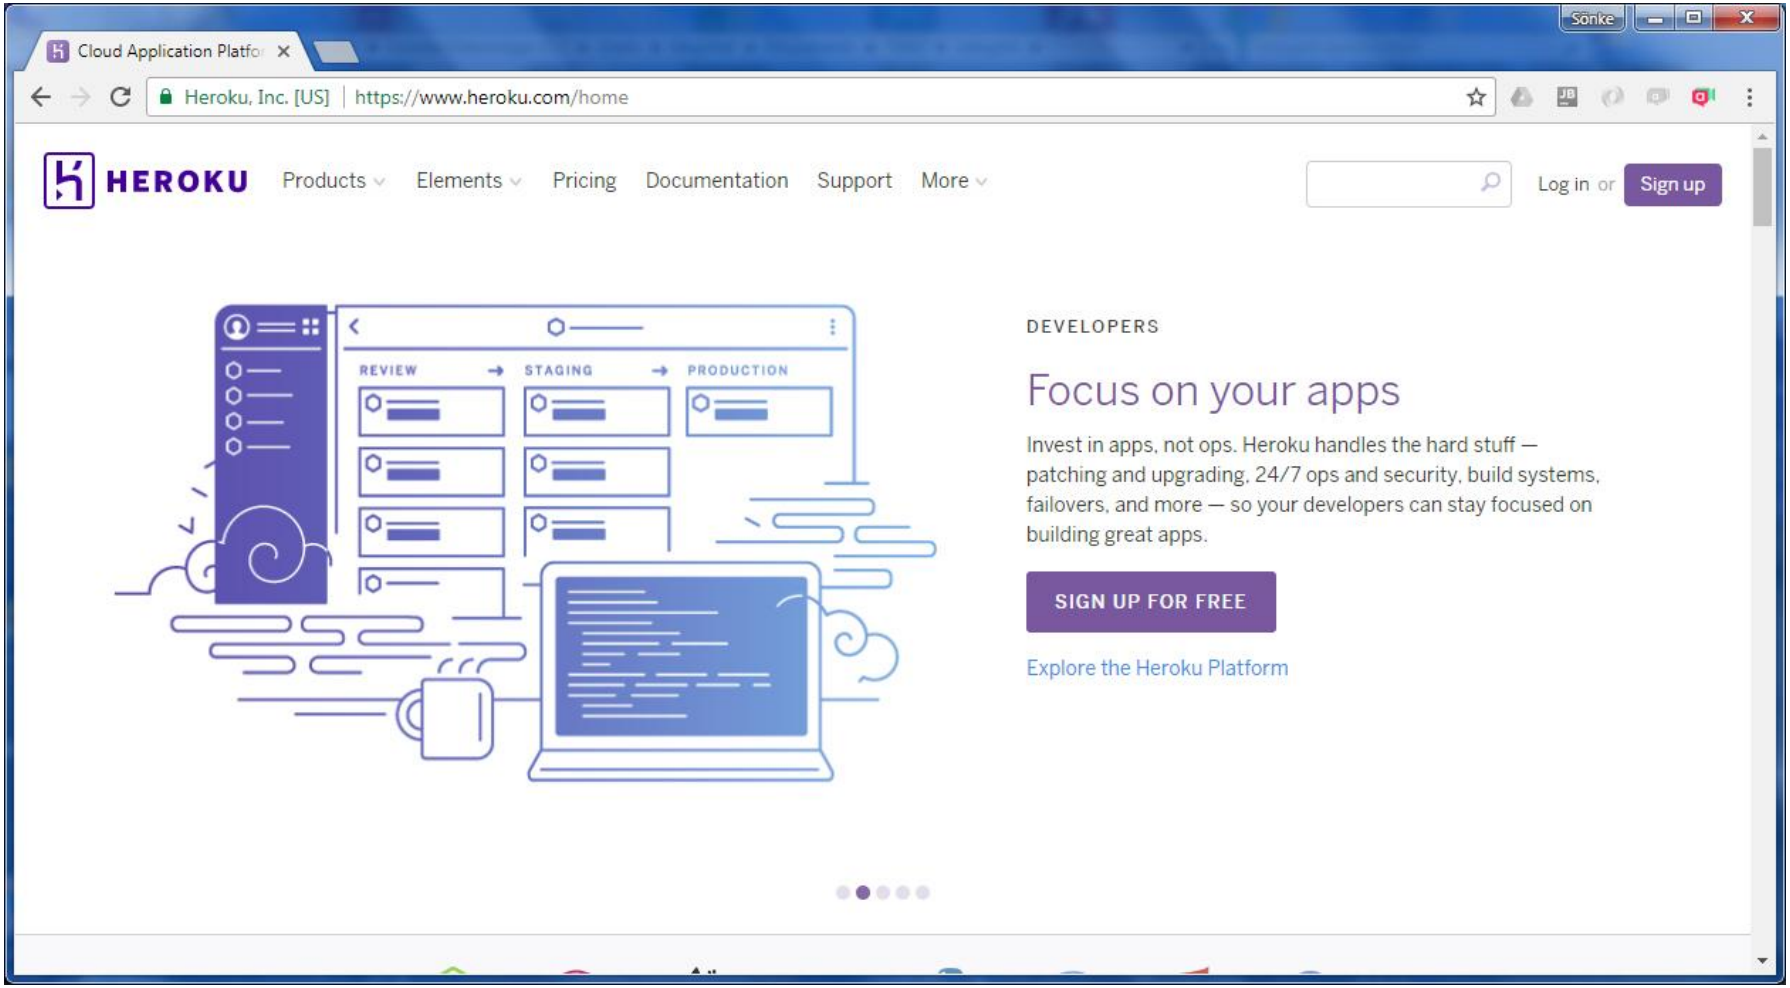
Development

Production

Dont forget to **`bundle install`**

get started

Sign up at heroku.com



publish your app

It is just 2 steps

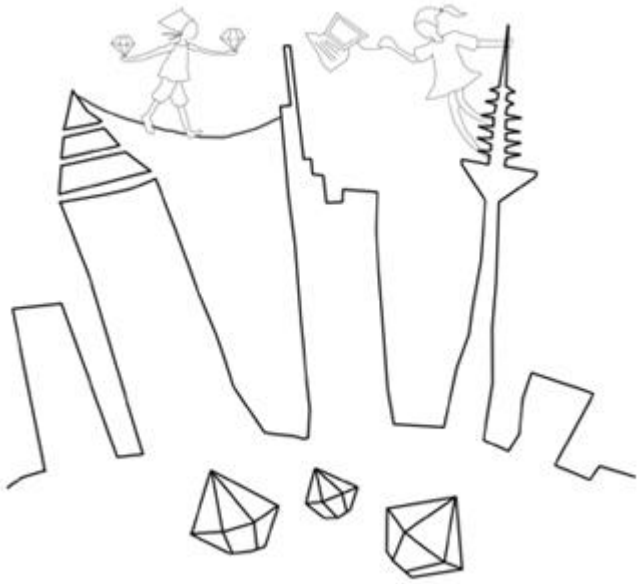
1. Create the app online (just once)

```
$> heroku create
```

2. Push/update your app online

```
$> git push heroku master
```

let me show that by live coding



wrap-up

1. Sign up at heroku.com
2. Prepare your Gemfile
3. In the console:

```
$> heroku create
$> git push heroku master
```

```
# Gemfile

group :development do
  gem 'sqlite3'
end

group :production do
  gem 'pg'
end
```
